

## National Laser Certifications

Voluntary Professional Credentials  
that set you and your staff apart  
from the rest. They Inspire  
confidence in your Clients and  
Colleagues

Laser Certifications for Medical Laser  
Safety Officers, Medical Laser Service  
Engineers, & Laser Operators in the  
Surgical, Aesthetic, & Hair Removal areas .

*Great preparation for non-medical  
technicians to enhance your "hire-  
ability" in an aesthetic medical  
practice. Gaining this certificate  
shows potential employers that  
you're motivated and educated  
about aesthetic laser use.*

# Medical Laser Certification

NCLE Est. 2000

***Perfect for National  
Certification of the Nursing,  
Technical or Aesthetic Staff  
in your Medical Practice***

[www.LaserCertification.org](http://www.LaserCertification.org)

# NCLE LASER CERTIFIED™

**www.LaserCertification.org to  
download the Candidate Handbook  
for full information on qualifications**

NCLE National Laser Certifications indicates a base level of academic competency in operating medical/aesthetic laser equipment in a safe manner, by indicating a working knowledge of the basic underlying physical principles and safety involved with medical laser systems. Certifications are provided for Laser Operators, Laser Safety Officers and Laser Repair Technicians. An NCLE Laser Certified™ designation indicates a high level of professional competency, and knowledge of medical/aesthetic laser operation. This professional credential may be used as a foundation on which to build further clinical competencies and gain State licenses for various laser procedures (varies in every state, please consult your State Medical Association).

## **NCLE LASER CERTIFICATIONS:**

- Certified Laser Operator Aesthetic- CLO/A
- Certified Laser Operator Surgical- CLO/S
- Certified Laser Operator Hair Removal - CLO/H
- Certified Medical Laser Safety Officer - CMLSO (administered by the Board of Laser Safety)
- Certified Laser Repair Technician - CLRT

## **HOW TO QUALIFY:**

Details on individual certifications are available in the Candidate Handbook at [www.LaserCertification.org](http://www.LaserCertification.org).

However the general requirements are as follows:

Formal Training: 5-40 hours of documented laser training

Proctored Written Examination: Available at over 750 worldwide locations, or at selected courses.

Educational Background: wide range from Bachelor degrees, MD, RN or Aesthetic licenses, and others.

Experience: 1-2 years for full certification. Those that don't yet have the experience may take the proctored exam if they otherwise qualify and become a Certification Candidate until they meet the experience requirement

**QUALIFYING COURSES:** Any accredited laser course will meet the requirements for testing, but selected training programs are also authorized to administer the exams.

**NCLE Member Organizations  
include, among others:**

- Rockwell Laser Industries (RLI)
- Laser Institute of American (LIA) and its Board of Laser Safety (BLS)
- Professional Medical Education Assn
- Multiple Training Providers

Applicants for NCLE Laser Certifications may download applications from the NCLE website and submit for approval for testing. Laser Training organizations may submit requests for approval as qualified exam proctors to include in your own training programs.
